Description:

The Kingston Gas Bottle Store is an excellent solution for safely storing either two or four 47kg propane gas bottles for static caravans and holiday homes.

With a wide-opening door and fitted ramp, loading and unloading gas bottles is a safe and easy process. The lifting lid means the gas regulator can be checked regularly and shut off valves can be accessed quickly in case of an emergency.

A partially open back and a built-in ventilation system allows air circulation and gas diversion, and a utility style lock will keep gas bottles safe from theft or damage. A tidy and safe alternative to having loose gas bottles stood next to a caravan or holiday home.

Material & Design:

Built from heavy-duty galvanised steel panels, the Kingston storage unit is completely weatherproof and won't rust. This unit has been designed with a lift-up lid which prevents water ingress, keeping gas bottles in great condition and protected from all weather conditions.

✓ **Ventilation System**
minimise condensation & damp

✓ **Utility Style Lock**
to deter thieves

✓ **Integrated Metal Floor**
sturdy & secure

✓ **Galvanised Steel**
durable & weatherproof

✓ **Made in the UK**
with a 10 year warranty
