Description:

Our Vertical Bike Stor is a great space-saving storage unit for valuable bikes. By storing the bike vertically on the back wheel, less floor space is needed freeing up space. This unit features an easy access ramp and a wheel retaining hook, so bikes can be stored by lifting and pushing the bike into the rail. The front wheel lifts over the wheel retaining hook, and then drops into place clamping the bike wheel into place.

There's plenty of space within the unit to hang helmets, bags and other biking gear by installing our galvanised SafeStor hooks available as part of our accessories range. To keep your bike and accessories safe, this unit features an anti-pick & drill multi-point locking system, and with an integrated metal floor it can be bolted to a concrete base. It has been designed with a 45 degree to create a 360 degree cycle pod when placed next to one another.

This unit comes with simple assembly instructions and a 10 year warranty.

Material & Design:

Built from heavy-duty galvanised steel panels with an integrated metal floor, the Malton is completely weatherproof & won't rust or leak. All storage units are designed with the fixtures within the unit to eliminate break-in points, and an anti-pick locking system to deter thieves. The clever design also incorporates a ventilation system to keep stored items in excellent condition free from condensation & damp.

✓ **Ventilation System**
minimise condensation & damp

✓ **Multi-Point Locking System**
with anti-pick & drill properties

✓ **Integrated Metal Floor**
sturdy & secure

✓ **Galvanised Steel**
durable & weatherproof

✓ **Made in the UK**
with a 10 year warranty
